

## Rigby Taylor wetting agents

Product	Benefits and Description	Dose Rate / Water Volume
<b>Breaker Dynamic</b>	Proven surfactant technology for the management of water-related problems. Superb control and prevention of Dry Patch. Improved penetration system. Gets active even deeper into the soil, even through hydrophobic layers. Breaker Dynamic encourages improved Root growth and there is no risk of scorch.	Programme application <b>20Ltr/Ha in 700Ltrs water</b> Single application <b>50Ltr/Ha in 700Ltrs water</b>
<b>RT Propel-R</b>	Advanced generation of water management solutions. New technology with soil micelle interaction that reduces soil repellency to zero. Propel-R improves water and air balance in the rootzone to enhance to soil rhizosphere diversity. In comparison with the industry standard, Propel-R gave the greatest benefit in the ability of rootzones to receive and benefit from irrigation.	Single application <b>20Ltr/Ha in 700Ltrs water</b>
<b>RT Penetr8-R</b>	Penetr8-R is an effective pre-conditioner of hydrophobic soils. It provides rapid (5 minutes) initial wetting of water repellent soils and moves excess water from the soil surface. Penetr8-R assists in flushing through excessive salt concentrations and reduces water puddling in low hollows.	Single application <b>5-10Ltr/Ha in 700Ltrs water</b>
<b>RT Breaker Fairway</b>	Breaker Fairway is a Breaker Dynamic formulation but specially modified to make it ideal for use on fairways and outfield areas. An economical wetting agent supplied in 200 litres for coverage of up to 5Ha.	Single application <b>40Ltr/Ha in 400Ltrs water</b>

**Also available in the RT Breaker Range – Breaker Dynamic Granules, Breaker Dynamic Pellets and applicator gun and Breaker Dynamic Big Pellets**
