

## Growth regulators

Selectives for use in grassland and forestry. Not recommended for use on fine turf.

Product	Active Ingredient	Description	Application
<b>RT Maintain</b>	121g/L Tinexapac-ethyl Pack size: 5 litres	RT Maintain produces a more dense, healthier sward and improved root mass. Maintain inhibits vertical grass growth but diverts it downward into the root system where it helps produce and increase food reserves and lateral stem development. Applying RT Maintain will reduce the number of cuts required per year in difficult to mow areas. MAPP: 15626	Variable application rates: ask for full product brochure.
<b>Primo MAXX</b>	121g/L Tinexapac-ethyl Pack size: 5 litres	Primo MAXX works by redirecting plant growth. It specifically targets the gibberellic acid site responsible for cell elongation in grass. Primo MAXX can be used on all well maintained quality turf grass areas such as fairways, tees, greens and surrounds. MAPP: 13374	Variable application rates: ask for full product brochure. PCS: 02273

## Nomix total droplet control

Product	Description	Application Rates
<b>Nomix Frontline Classic Sprayer</b>	The Frontline Classic combines the latest low volume application technology, with Nomix TDC herbicides, to control weeds safely, effectively and efficiently. A lightweight system where the 5 litre of herbicide connects directly to the applicator. A rechargeable battery is powerful enough for 2 days spraying without the need to recharge. Optimal operator control in all situations with electronic trigger mechanism.	See herbicide information below.
<b>Nomix Frontline Compact Sprayer</b>	The Frontline Compact is a lightweight, easy to use low volume herbicide applicator. The 750ml herbicide cartridge connects directly to the end of the applicator. Ideal for smaller areas of use – no backpack. Rechargeable batteries give up to 35 hours spraying time per charge. A more accurate application and ease of use with the pacer control system.	See herbicide information below.
<b>Nomix Dual 162g/L Glyphosate 2.22g/L Sulfosulfuron</b>	The only residual herbicide approved for use on both hard and soft surfaces. Nomix Dual can be applied to visible weeds and to areas of potential weed growth including pavement edge, kerbs, around paving stones and gaps in the pavement. Dual can also be applied to areas including shrub beds, tree bases and gravelled areas. MAPP: 13420	9 litres per Hectare Available in 4 x 750 ml packs or 1 x 5 litre pack
<b>Nomix Hilite 194g/L Glyphosate</b>	Nomix Hilite is a technically advanced non-irritant glyphosate formulation. Rainfast with 30-60 minutes of application. Hilite controls broad-leaved weeds, along with annual and perennial grasses in amenity and industrial areas, including parks, highways, paved areas and factory sites. It is also effective for clearing vegetation prior to planting, around tree bases, around ornamental species as well as forestry situations. MAPP:13871	7.5-10 litres per Hectare Available in 4 x 750 ml packs or 1 x 5 litre pack
