

A close-up photograph of a roll of artificial turf. The top part of the image shows the edge of the roll, revealing the woven backing and the tufts of grass. The bottom part of the image shows the surface of the turf, which is a dense field of green, blade-like fibers. The overall color palette is a range of greens, from light to dark, with some shadows and highlights that give the turf a textured appearance.

COBURN'S

Verde Sports artificial grass

Product	Description	Size
Verde Tee Turf	Verde Tee Turf is an all weather tee which provides a surface which allows you to tee up from any position. A sand/rubber infill is essential for golf applications. Verde Tee Turf has a unique 45mm hybrid design, tufted from a mix of curled and straight polypropylene monofilament yarns. The curled yarn provides a thatch that holds the straight yarn vertical. Sand and rubber crumb should be brushed into the pile. Verde Tee Turf is designed to take either a standard tee peg or for the golfer to drive straight off.	2m or 4m width (sand infill required) 2 x 25 kg Silica Sand and 1 x 25kg Rubber Crumb required per 1 sq metre – available from Coburns.
Super Verde Tee Turf	Super Verde Tee Turf is an ultra dense nylon artificial grass, designed and constructed especially for the golf market. This 36mm non-infill golf tee is dense enough to support a tee peg, yet durable enough to drive straight off the surface. Launched in 2012, this demanding product has been constructed out of curled nylon monofilament yarn, chosen for its resilience and hardwearing characteristics. Ideal for winter and all year round tees and driving bays.	2m or 4m width (no sand infill required)
Verde Turf	Verde Turf is a 20mm open pile and the “tough guy” of the bunch. Infilled with 20kg/sq metre of kiln dried sand. It will provide a lawn for kids to play football and pets to run on, whilst remaining attractive for relaxation. Verde Turf has been installed on thousands of golf course pathways and private lawns.	2m or 4m width (sand infill required)
Verde Super Verdegrass	Super Verdegrass is a heavyweight closely tufted long pile surface, well suited to situations of heavy traffic in public places such as parks, sports club corridors and locker rooms, etc. It makes excellent walkways in heavy trafficked areas and is for use in areas where the presence of sand may not be desirable.	2m or 4m width (no sand infill required)
Verde Golf Mats	Verde offer two standard types of golf mats/golf driving mats, both available in various sizes, ideal for use in driving ranges, out on the course and home practice use. All the golf mats come with pre-fused holes and are supplied complete with rubber tees to suit. Slots are available in the Two Star option mat (no rubber tees supplied).	1.50m x 1.50m 1.50m x 1.00m 2.00m x 1.00m 2.00m x 1.50m
Verde Fairway Mats	Playing golf during Winter can be a problem for every greenkeeper. Verde Fairway Mats protect the fairway, preventing divots and reducing maintenance costs. The course may remain open during adverse weather conditions with the use of one of the fairway mats. Two options are available – The Portemat and the Turf Protector.	30cm x 15cm 45cm x 15cm Other sizes made to special order.
